

EDUCATION

2021 – 2026	UNIVERSITÉ SAINT JOSEPH (USJ) Bachelor’s degree in mechanical engineering - Strong foundation in mathematics, physics, numerical methods, programming and engineering analysis - Coursework emphasizing optimization, control systems, thermodynamics, fluid mechanics and computational engineering.	Mansourieh, LB
2006-2021	Grand Lycée Franco-Libanais (GLFL), Achrafieh French baccalaureate Graduated with distinction	Achrafieh, LB

ENGINEERING PROJECTS

December 2025- May 2026	Design and Development of a Pedal-Powered Electrical Energy Generation System - Final Year Project carried out by a two-member mechanical engineering team - Designed and developed a complete electromechanical energy generation system from concept to implementation. - Conducted system assembly, testing, performance evaluation, and iterative troubleshooting to improve system efficiency. - Researched technical documentation independently to solve engineering challenges.	USJ, LB
September 2025 -December 2025	Design and Development of an Autonomous Sumo Robot - Designed and assembled an autonomous electromechanical system integrating sensors, motors, and embedded control systems. - Programmed embedded control systems using Arduino and C++. - Performed system testing, calibration, and troubleshooting to ensure reliable operation.	USJ, LB
January 2025- May 2025	Design of smart HVAC/ VRF and control system for a luxury apartment of 500m² - Multidisciplinary project completed by two mechanical engineers, one electrical engineer and two software engineers covering mechanical, electrical, and control aspects - Designed HVAC/VRF system with heating/cooling load calculations, duct and refrigerant pipe sizing. - Integrated ASHRAE-compliant ventilation, humidity, and air quality control. - Selected pumps, piping, and plumbing network following NPC standards. - Assisted in the selection of HVAC equipment and mechanical components while improving system performance and energy efficiency.	USJ, LB

WORK EXPERIENCE

14July 2025- 22 August 2025	DAR AL-HANDASAH Summer internship – Mechanical department (Infrastructure) - Performed engineering calculations and quantitative analysis for infrastructure projects including hydraulic network sizing and pump selection. - Conducted system modeling, engineering calculations, and optimization of chilled water distribution networks. - Applied engineering standards to perform technical calculations and validate infrastructure designs. - Collaborated with multidisciplinary engineering teams to deliver technically compliant infrastructure solutions. - Assisted in the study and design of tunnel ventilation systems using engineering guidelines, standards, and technical documentation	Verdun, LB
8 July 2024- 16 August 2024	MIDDLE EAST AIRLINES Summer Internship - Gained practical exposure to aircraft mechanical maintenance operations and maintenance procedures. - Observed inspection, servicing, and troubleshooting of aircraft mechanical systems within the Mechanical Maintenance Department. - Delivered a technical presentation on hydraulic, fuel, and electrical systems to industry experts, receiving the highest evaluation	Beirut-Rafic Al Hariri International, LB
June 2023 September 2023	Customer & Sales Support Representative - Communicated with customers through Discord to confirm product or service purchases after their purchase decisions - Ensured order details and customer requests were accurately confirmed before transaction completion.	Remote, Discord
April 2019 May 2019	Hôtel Dieu De France – Hospital Internship - Informed about the functioning system of the operations - Informed about the functioning system of the nurses	Achrafieh, LB

MISCELLANEOUS

Languages	English (Fluent), French (Fluent), Arabic (Native), Italian (Basic), and Spanish (Basic).
Computer Skills	C++, Python, MATLAB, AutoCAD, SolidWorks, EPANET, SPSS, Arduino, Abaqus, HAP, Grundfos...
Community	▪ Completed community service with the Lebanese Red Cross, developing teamwork, communication and emergency response skills. ▪ Competitive football player with experience across multiple professional academies
Hobbies	Enjoy playing Football, robotics, technology and weightlifting <i>References to be provided upon request</i>
